## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

**DETAILED ACTION**

***Status***

1. Claims 20-38 are currently pending in this application.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

3. The drawings submitted on 10/30/2001 are in compliance with 37 CFR § 1.81 and 37 CFR § 1.83 and have been accepted by the examiner.

***Information Disclosure Statement***

4. The information disclosure statement (IDS) submitted on 2/4/2002 has been considered in part. Numerous NPL documents and foreign patents were listed on the IDS however were not available for review. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 20 and 27:

The primary reason for the allowance of claim 20 is the inclusion of the method steps of: measuring with a thermometer the actual temperature as an equivalent of the

temperature of the sample at a high repetitive accuracy and with a maximum permissible lag error between the temperature of the water bath and sample temperature set by the required accuracy of determining the salinity, a control parameter for taking into account the thermal conditions being the time-wise drift of the temperature derivable from the temperature measurements, the permissible maximum value of which is defined as the quotient of the maximum permissible lag error and a time constant of the measuring cell for a temperature equalization between the interior of the measuring cell and the water bath, and controlling with a control device the permissible maximum value of the time-wise drift of the temperature of the water bath by maintaining a low-lag and quickly controllable compensation of the heat currents flowing into and out of the water bath such that the resulting quantity of the residual heat current does not exceed a predetermined maximum value. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

The primary reason for the allowance of claim 27 is the inclusion of: a control device for controlling the actual temperature of the water bath at high repetitive accuracy and at a maximum permissible lag error between the water bath and sample temperature determined by the accuracy demanded by the determination of salinity as the equivalent of the temperature of the sample, the control parameter for taking into account the thermal conditions being the time-wise drift of the temperature of the water bath the permissible maximum value of which is defined as the quotient of the maximum

Art Unit: 2863

permissible lag error and a time constant of the measuring cell for a temperature balancing between the interior of the measuring cell and the water bath and means for low-lag and quick adjustment of heat currents flowing into and out of the water bath for maintaining a permissible maximum value of the time-wise drift of the temperature of the water bath such that the quantity of the resulting residual heat current does not exceed a corresponding predetermined maximum value. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

Claims 21-26 are allowed due to their dependency on claim 20.

Claims 28-38 are allowed due to their dependency on claim 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dauphinee et al. (US # 4511845) teaches a salinometer.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ADITYA S. BHAT whose telephone number is (571)272-2270. The examiner can normally be reached on M-F 9-5:30.
